

CSES Student Internships:

Mark Ingram, ESWS, interned with **Ozark All Seasons**, located in Winslow, AR. He compared the sustainability of hydroponic greenhouse farming to traditional soil farming.

Taylor Parks, CPSC, interned for **Loveland Products Inc.** at their research farm in Owensboro, Kentucky. In this photo he is planting corn in a randomized complete block.

Tyler Durre, ESWS, worked as an environmental science intern with **Burns & McDonnell** in Kansas City, MO. In this photo he is staking existing wetlands in Fayette, OH.

Mitchell Pruitt, ESWS, interned at **Hawk Mountain Sanctuary** in Orwigsburg, PA, in the field of raptor conservation. He got to work hands-on with several of their current projects, including work with Black Vultures.

Taylor Farr, CPSC, interned with **Mid-South Ag Consultants**, Crawfordsville, AR. During his internship, he focused on Management of Glyphosate-resistant Palmer amaranth in Soybean in Northeastern Arkansas.

Julia Shell, CPSC, completed a summer internship with **Tennessee Farmers Cooperative**. She scouted tomatoes, took tissue samples, and assisted farmers at the Washington Farmers Coop.

Paige Boyle, ESWS, helped design a proposed stream restoration as part of the **University of Arkansas Ecosystems Research Experience for Undergraduates (EcoREU)**.

Matt Moore, CPSC, presented his summer internship research at **Syngenta's North Carolina headquarters**. His project researched Syngenta's Fast Start Performance Cotton program that has to do with applying fungicides on the early stages of cotton to improve growth and development.
